Christmas party-Euro class

This week, students in Seconde and Première Euro class cooked themselves pancakes with that [recipe](#), while listening to [Christmas songs](#).

They had studied the recipe in English, that means vocabulary : ingredients, kitchen tools, servings. And they realized that on American recipes, the ingredients are not weighted but their volumes are measured in cups, tablespoons and teaspoons.

No idea for your Christmas breakfast ? You can find the entire recipe [here](#).

Read carefully the advices so that your pancakes are as fluffly as ours.

Baking powder equivalent is "levure chimique alsacienne".

Enjoy !

We wish you a merry Christmas and a happy new year !

Equivalence weight / volume :

1 1/2 cup flour = 195 g de farine

1 1/4 cups milk = 295 ml de lait

1 tablespoon = 15 ml = 1 cuillère à soupe

1 teaspoon = 5 ml = 1 cuillère à café
